

Nice to meet you.

Unlimited entertainment.

Almabox.

There are those who fly to Germany or London to believe in their ideas and there are those fortunate enough not to have to move from Italy.

We found our Silicon Valley in Brescia.

Almabox Srl is our startup founded in 2008 with a very specific idea: to change the gaming experience embracing new frontiers of entertainment and improving the systems of man / machine interaction.

Thanks to advanced techniques we are able to offer to our clients innovative solutions that can be customized; this is why during these years we have become point of reference for important brands that chose us and trusted us.

The value of our work can not be measured with the power of our products but with the numbers of smiles that we are able to give.

Surprise your customers.

Your entertainment. Your business.

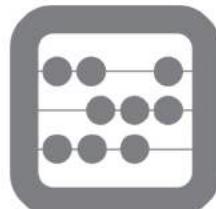

Almabox developed products designed to entertain people and easy to use: simple acts like touching, running and jumping can stimulate creativity and fun.

They don't require maintenance or the presence of a babysitters so you can save an enormous amount of time and money.

Almabox products are the right answers to improve your business and to offer a better experience to your customer: children can play, parents can stay longer on your premises and you can work in a complete peace.

Satisfaction rhymes with customers retention.

Ideal for:

Entertainment
centers

Nursery
and schools

Hotels

Restaurant
and
fast foods

Fun parks
and
game rooms

Shopping
centers

Interactive floor.

A magic carpet.

Every single child dreams of a game that can play with him!
Such an addictive game able to send you straight into the adventure
and so clever that can respond to every single movement.

So we create a game like this just for them.

The Almabox interactive floor is composed of a system of motion sensors,
an interactive projector and a computer, which allow you to interact with games through the projection of dynamic images on the floor.
Children can move freely and interface with the game in total freedom.

Surprise your customers.

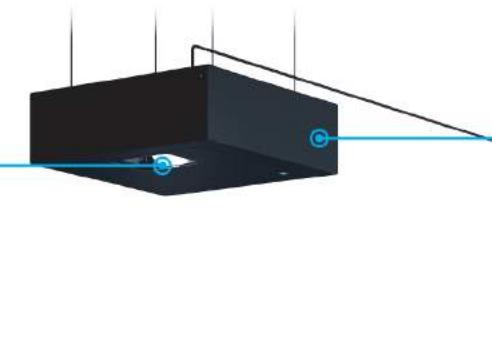

Your interactive play area.

It entertains children so that parents/clients stay longer on the premises.

It's the right answer to increase your business and to offer a better experience to your client.

Interactive Projector
The product is composed of a system of motion sensors, a projector, speakers and a computer, which allow you to interact with games through the projection of dynamic images on the floor.

Plug & Play System
All the systems are perfectly integrated inside the console, without having to connect any other external device. All it takes is an electrical outlet and a Wi-Fi network.

Turnkey Installation
Our technicians, after an inspection, personally intervene on site to install the product.

Immediate Assistance

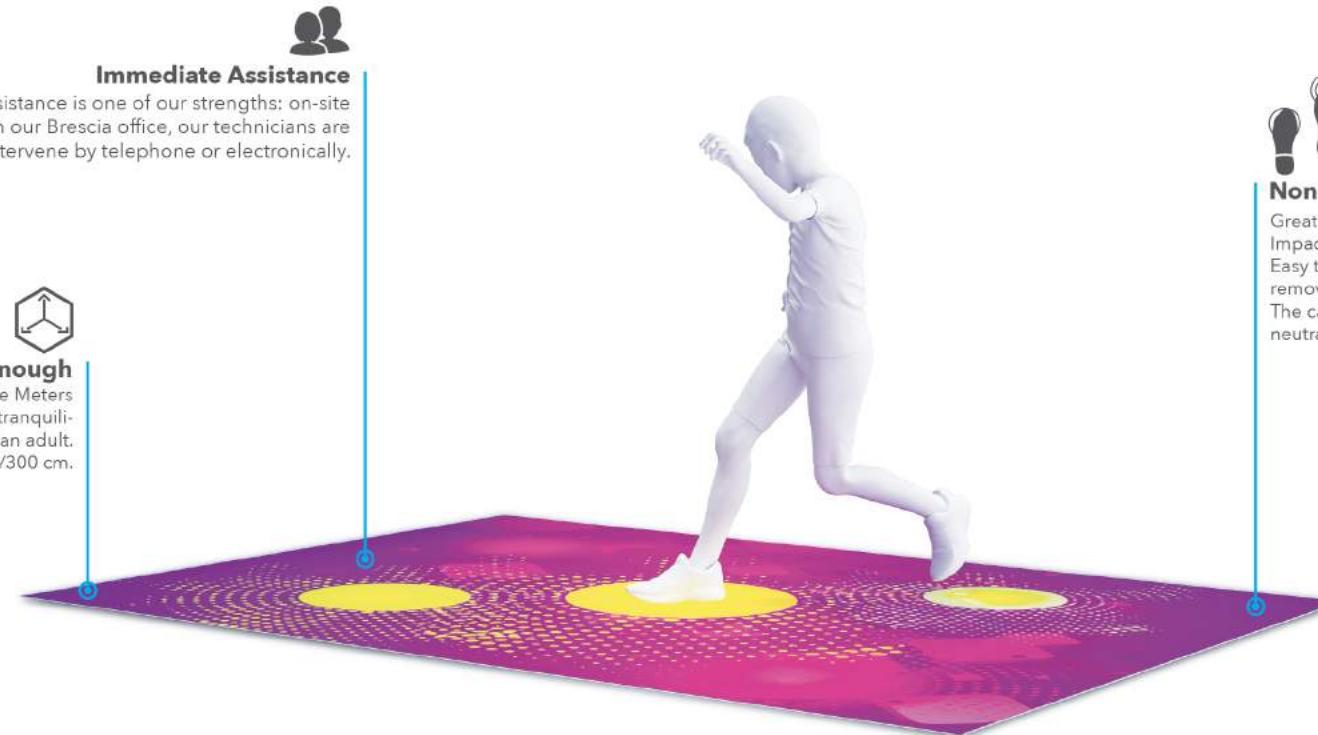

Immediate assistance is one of our strengths: on-site or directly from our Brescia office, our technicians are able to intervene by telephone or electronically.

Only 6 Square Meters are enough

Almabox does not require large spaces, only 6 Square Meters are enough: 300 x 200 cm. Children can play in total tranquility and autonomy without the presence of an adult. Recommended ceiling height: 250/300 cm.

Available colors:

Non-slip Linoleum mat

Great for play areas.
Impact resistant thanks to its elastic properties.
Easy to clean: an antistatic cloth or vacuum cleaner is perfect for removing dust.
The carpet can be washed with a well wrung wet cloth using water or neutral detergent.

Monitor touch screen.

Our idea of Touch.

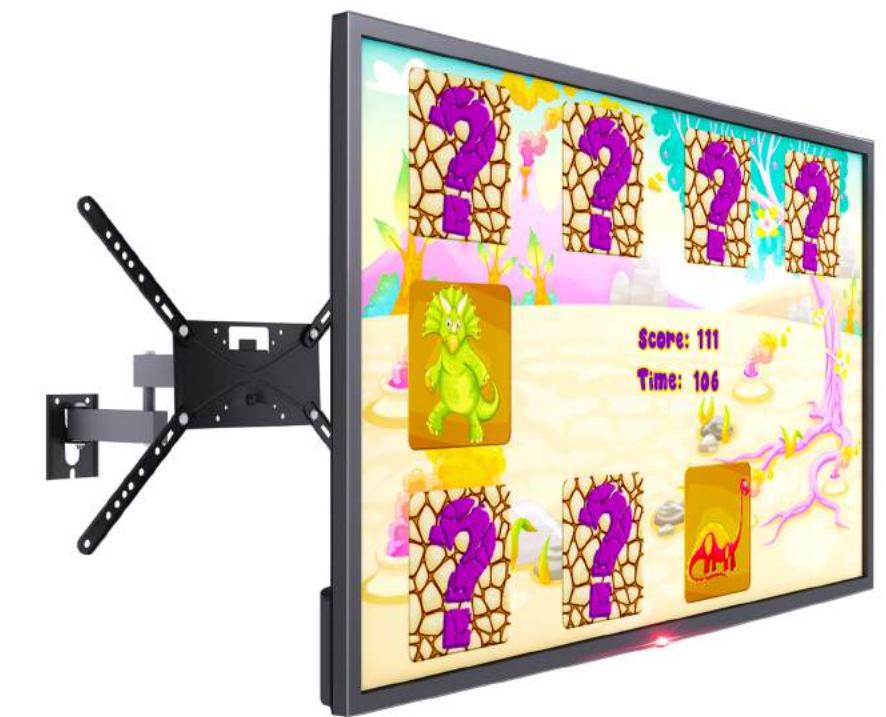

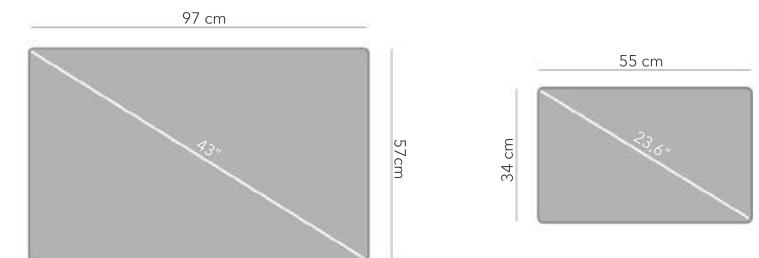

A new TouchBox.

All the fun in just a screen.

A big display that children have always dreamed of.
More than 20 Apps to play with.
It will be the start of a new experience, a whole world of games that
you can choose from the menu, in line with the taste of the children.
Incredible adventures, in one place, to play on our new Touch
Screen.

Available sizes:

Is coming.

The software designed to play with you.

Alex.

The Alex software developed by Almabox is the heart of each device. It offers you virtually unprecedented gaming experiences on other consoles, because it is designed and engineered exactly for the hardware it runs on, and vice versa.

It is able to dialogue with motion sensors, touch monitors and directly with our office to stay up to date. Alex has a whole suite of fun apps with which to entertain adults and children.

They are apps created just for the computer, and not web apps that have to be played on a browser. In this way Alex is able to exploit all the power of the computer present in our devices, guaranteeing greater reliability and very fast performance.

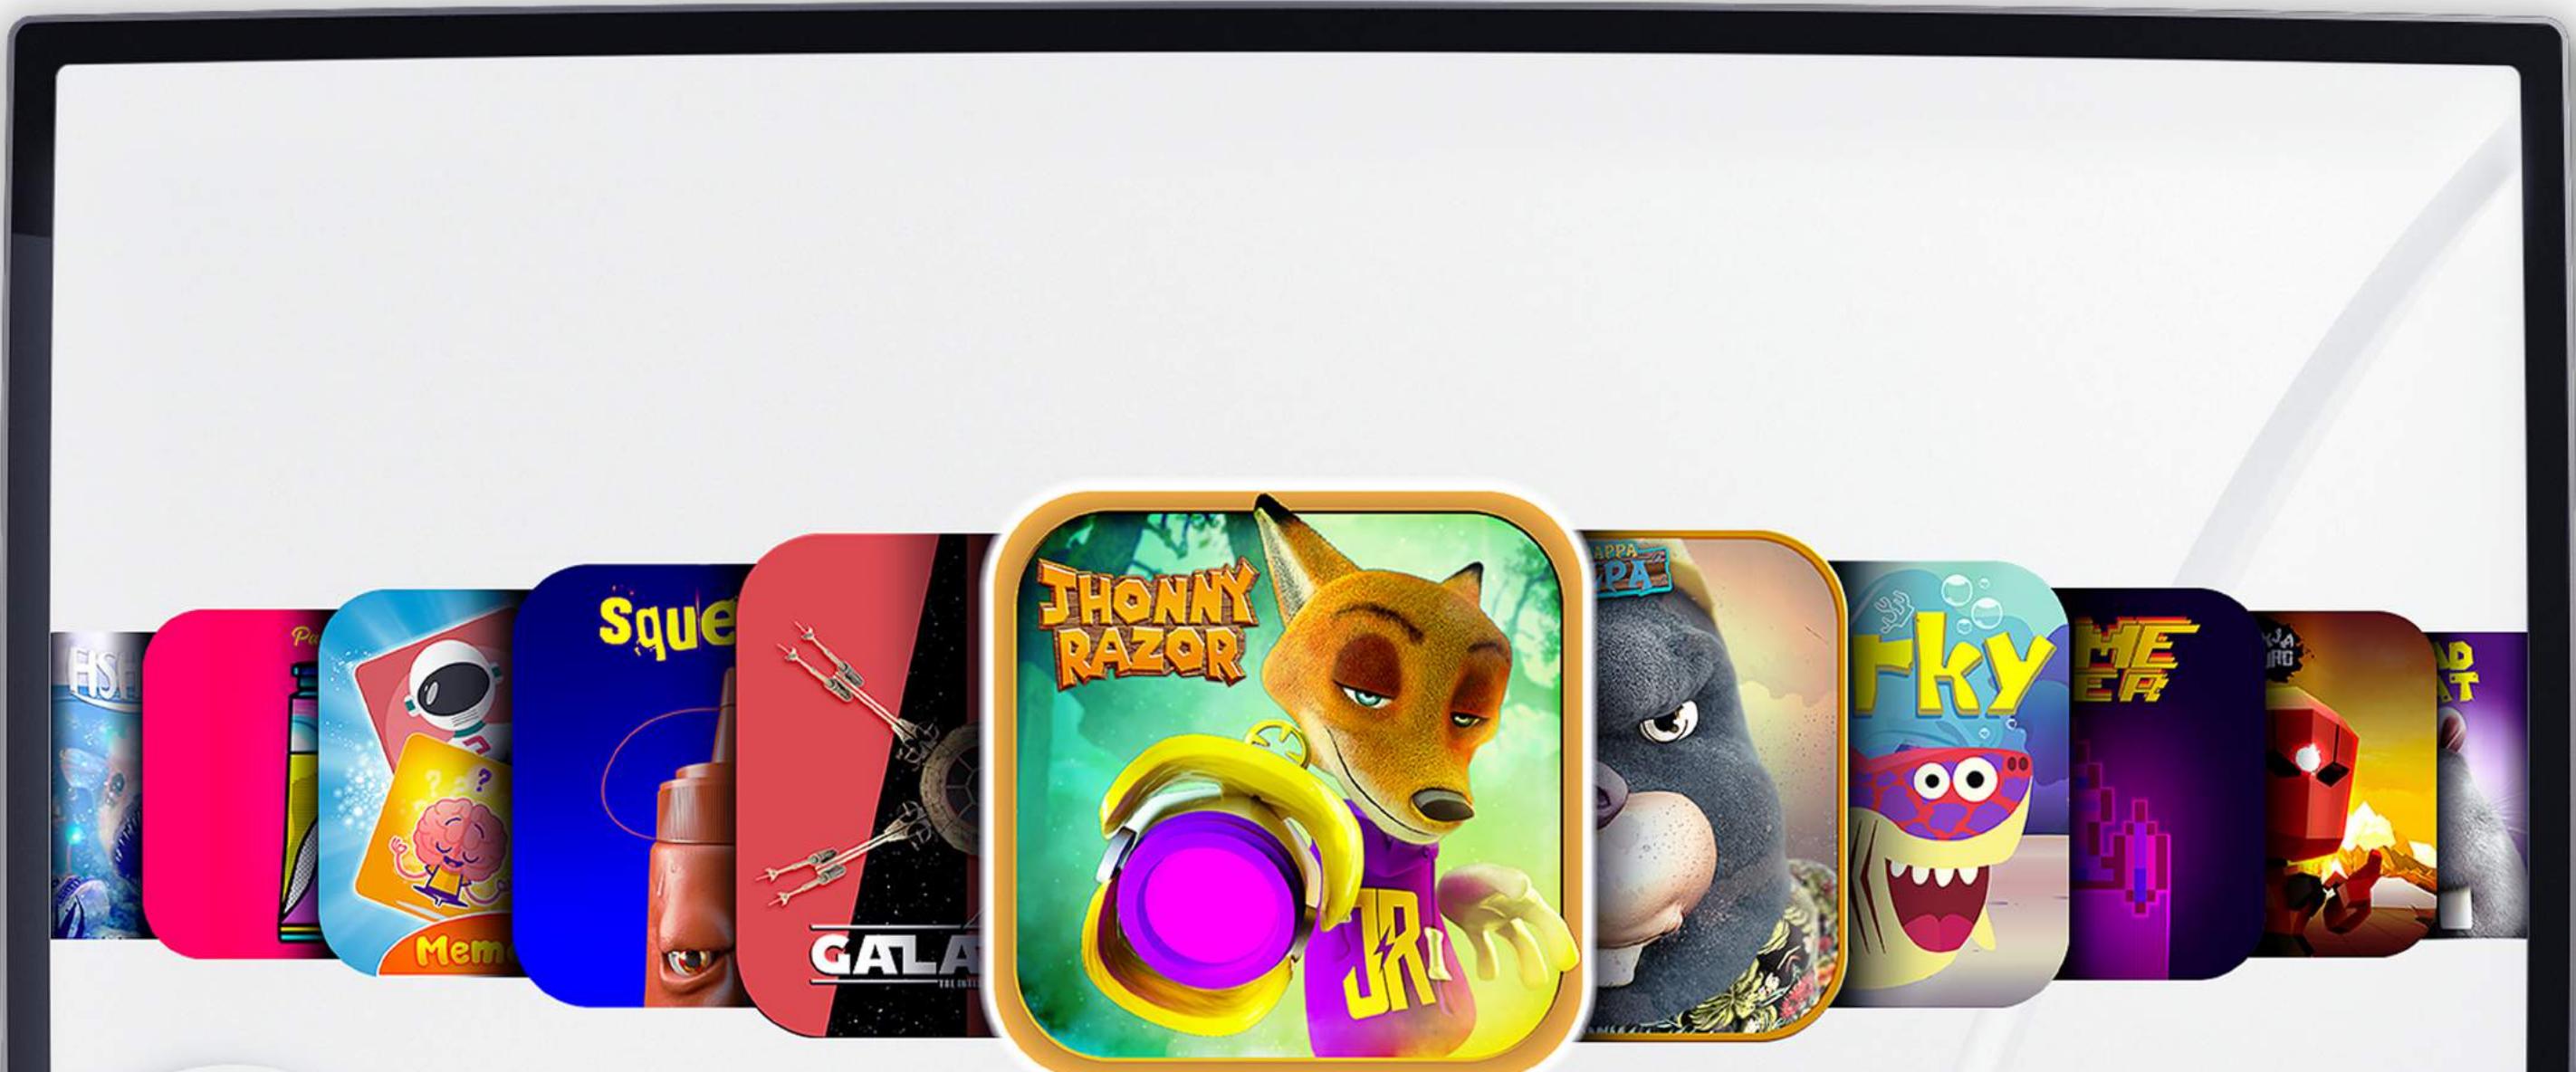

A 1.1.0

Choose your next adventure.

**With many Apps
included in all devices.**

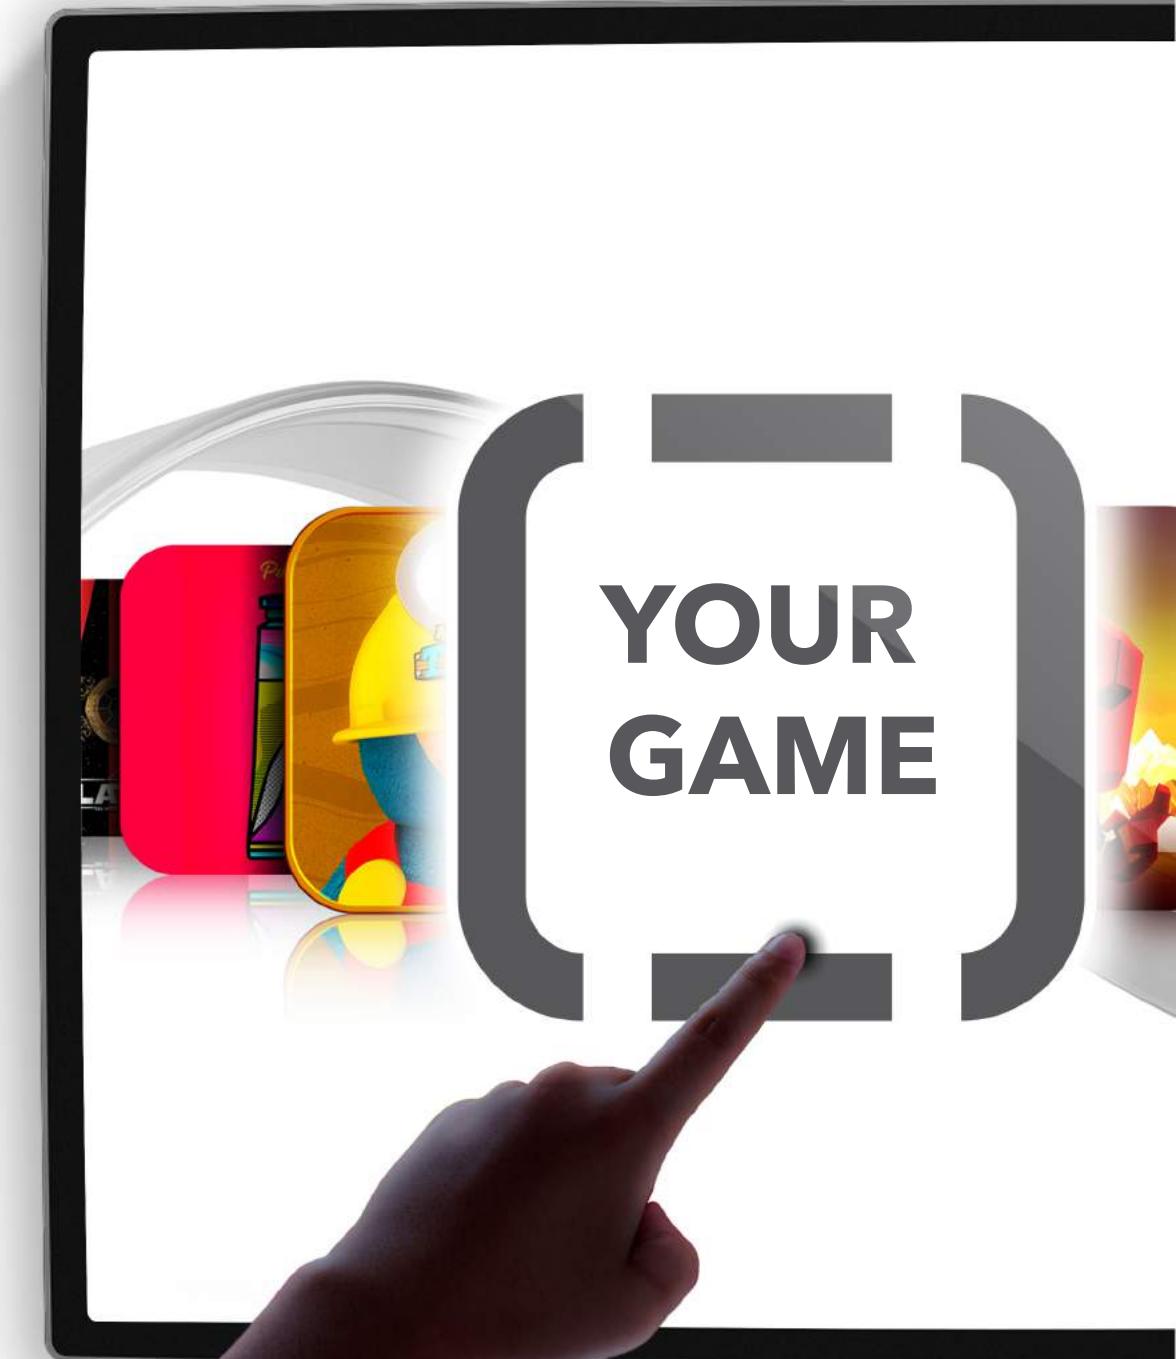

Customization.

Your characters, your stories.
